

## New Comments page functionality

Comments [Return](#)

[Refresh](#) | [Save](#) | [Save & Return](#)

Comment Text\*:

Number:

Active: ☐

Categories:

Available Categories: ☐ Cat2 ☐ Cat3 ☐ Cat4 ☐ Cat5

Selected Categories: ☐ Cat0 ☐ Cat1

### Acceptance criteria:

1. The 'New Comment page' allows the user to provide data for a newly created comment.
2. On this page user can also assign categories to the comment and choose to activate or inactivate the comment.
3. The page consists of 'Comment Text' and 'Code Number' text boxes, an 'Active' checkbox and an available/selected control. The 'Selected' categories will be empty for a new item, contain the assigned categories for an edited comment and contain the categories assigned to the comment on which this duplicate was based for a duplicated comment.
4. In all cases, the 'Available' categories will be populated with the collection of available categories excluding those that are in the 'Selected' categories list box.
5. The 'Comment Text' and 'Code Number' text boxes are used for data entry. These text boxes have the following format:
  1. 'Comment Text': 50 characters optional-required field, case insensitive, has to be unique. Cannot contain reserved characters (=, /, |, , , \*, (, ), \_ , : , ; , #, %, ^, ?, [ , ], etc.). expect characters ( , . ? ! ; ) .
  2. 'Code Number': One-3-digit integer number (from 0 to 999), optional field, has to be unique. Both fields are empty on 'New' user action.
6. The 'Active' checkbox indicates (when checked) that the comment is active. If it is not checked, it indicates that the comment is inactive. The 'Active' checkbox is checked by default for a new Comment.
7. Using the available/selected control, the user can add categories to or remove categories from the comment. A comment must have at least one category assigned to it. If no categories have been selected, and the user attempts to save the comment the following error in red color will be displayed: "Comments must be assigned to at least one category. Please select a category before trying to save this comment again."
8. On trying to save 'Comment Text' without any data or putting more than 50 symbols into the field - specific error should be shown respectfully to the cause.
9. The "new comments" page menu has the following options:
  - The Link "Refresh" resets / refreshes everything on the page.
  - "Save" - saves the new comment and everything that was marked on the page.
  - "Save & Return" - saves everything and returns to the previous page.
  - Link "Return" - leaves this page and returns to the main page.
10. Arrow buttons between Available Categories and Selected Categories.
  - The double arrow moves all categories to another window.
  - Button with one arrow - toggles the selected categories.
